

## 16-11-2014 Monday: : 11 pm to 01 am

After the first stage of project completed, we started preparation for the endsem. so, we have decided to start second stage of project after endsem. on 16 nov, we met for the cs project. Today, we discussed and sheduled our project time. we did just fun not more study.

## 17-11-2014 Tuesday: : 11 am to 12 pm

As Laksh is more adapted to C++ and also our teamleader. so, he took responsibility of most of the coding. some more discussion went on . And then we shifted our meeting to today's night.

## 17-11-2014 Tuesday: : 09 pm to 02 am

Today, firstly, we have problem that how to make structure of minesweeper board. we discussed about that how many levels should be and in these levels, how many rows and column should be. we also have to decide the no. of mines. we discussed a lot and all were decided.

Now, we have problem that how we will arrange the mines. we thought a lot but nothing happened. then, we went through previous programs given in the cs101 website. Laksh understood them and discuss with us.

At starting, we assumed some functions and started some parts of coding.

## 19-11-2014 Thursday: : 10 pm to 03 am

This was our last meeting before the Endsem because it was on 23rd. so, we also have to study for that. we had aim to complete the whole coding today. we started with full strength but how much we thought, it was much more tougher than that for us. everytime we made program and when we ran. a lot of errors came. we were losing our hope. But our teamleader is so active that us. he started understanding from the begining that what faults we were doing??

Then again we started with full courage. this time it ran but not in that way as we wanted. so, once again and again, it went on and at last we have completed coding for first level. we were tired so, parted away.

## 23-11-2014 Sunday: : 10 pm to 02 am

This night was very important for us because it was the last night for us. Next day, we have to submit our project. We proceed our coding from the last time we left. Now, we have to extend our program to other higher levels. It took a lot of time and we have just bored doing this. We took a break and walk to campus for some time. Then again it continued and at 01 am, we finished it. Then we checked it and then we have to remove all the errors coming out. After that our program ran and finally sweet smiles had flown through our faces. Laksh said he will make better. But I was tired. So, I went to sleep.

## 24-11-2014 Monday: 03 pm to till submission

Today, at first we ran our game "minesweeper" many times and played once at beginner's level. After that we started our rest works that is we have to make SRS file, User manual and project report. We divided our works. We were discussing about project and then we were typing. It took time. But we did it.....
