MY DIARY

MONDAY(06/10/14)

Today , all of us met and discussed which project should take. Among all the list of projects finally we decided to take library management.

SATURDAY(11/10/14):1-2am

We gathered to the team meeting in sahith's room . There we discussed what is this project about and the made rough outline .We decide to learn more things about it in next session.

WEDNESDAY(13/10/14):8:30-10:15pm

We met in the OSL . While discussing we found that interface , database and search algorithm are the main things in it .So I searched about interfaces on google and youtube. I had given task to create windows mainly And

FRIDAY(17/10/14):9:30-11:30pm(MY ROOM)

I searched things about creating windows and learned somewhat .

SUNDAY(19/10/14):2-8pm(SAHITH ROOM)

We came together for the final work and we combined all our work for stage 1 submission.

WEDNESDAY(22/10/14)

I discussed my ideas about the project with my roomie and he also suggested some good suggestion .

TUSESDAY(28/10/14):10-11:30pm(SHREY'S ROOM)

After coming from holidays this was our first meet. I was going to add graphics in project and some code .And ,we were informed in our class that simplecpp graphics in codeblocks has given . I got that in my pc first and installed.

WEDNESDAY(29/10/14):

I saw all the simplecpp lectures . I struggled somewhat to understand it well.

WEDNESDAY(5/11/14):9-10pm(SHREY's ROOM)

All of us started writing the main function which included files handling and sahith helped in that.

SUNDAY(16/11/14):2-4pm(SHREY'S ROOM)

Then , I team members what we can do with simplecpp like we make buttons and working with only one window(canvas). But actual problem arrived were required to input on canvas and displaying text instead of console . We tried to solve that but couldn't. And ,we dropped the graphics idea in middle.

FRIDAY(21/11/14):9-10:30pm(SHREY's ROOM)

My did not get wasted . In that I learned many things about graphics like SFML which I thought I should do this one but time did not permit. Then I wrote librarian loop and member loop some what.

SATURDAY(22/11/14):1-3pm

I improved my code .I found errors and corrected it.

SUNDAY(23/11/14):

We again started finding bugs and then debugging them took several hours .In it we modified our code.

MONDAY(24/11/14):

I helped Sahith and Shrey making documentation of project.
