Rakesh Siya

12/10/2014
This was the first group meeting. We discussed the project. I had gone prepared for this meeting by playing minesweeper. I had never played it before so playing the game helped me to understsand the project.
The meeting was from 5 to 6:30. I was assigned the task of opening all the cells of the grid which contained a mine when the user opened a cell which contained a mine.

I read the book by A Ranade for some time and searched on google for ihnts. I spent around one hour on this task.

15/10/2014
I read Abhiram Ranade's bok for 1.5 hours.

16/10/2014

The group met in the lab. We discused the program that Imran had written. We cleared a few doubts by asking the TA questions.
