

Readme

Set tab size as 4 when viewing the code. The files may not be displayed correctly when viewed in windows.

In your home folder, extract the ezwcs101.tar.gz file. This can be downloaded from IIT Bombay Moodle : CS101 course page.

Inside that folder copy 311Final_report.tar.gz

Using terminal compile the screen2.cpp. The file location is
home folder/ezwcs101/311Final_report/Code/screen2.cpp

the command is ./compile screen2

After the compiler is finished, use ./screen2 to start the game.

ENJOY!!!

Note : If the high score window is displaying garbage values, the high score binary file needs to be re initialised.

Remove the commenting of line 108 of hi_score.h header file. Compile the program and play once. Now go to hi_score.h and comment line 108 again. Line 108 is initialise();

Compile the code and go to high score window. It should show all 5 player names as default and scores as 0.
