## 1 SECTION 1

**NOTE THAT THERE IS NO NEED FOR A SEPARATE ABSTRACT SECTION.**

APSys 2017 [1] seeks submissions of extended abstracts describing novel work in the broad area of computer systems, for presentation as posters and demos during the workshop. We highly encourage posters (and accompanying demos, if applicable) on thought provoking ideas that are likely to lead to interesting discussions. The posters and demos will be presented during an evening reception at the workshop. The poster session is meant to introduce new or ongoing work, and provides opportunities for authors to get valuable feedback from the conference attendees. Please note that the posters or demos will not be part of the conference proceedings.

## 2 SECTION 2

You are required to submit an extended abstract of no longer than two 8.5x11 inch pages, including references. The submissions must be in PDF format, and must include a title and the complete list of authors and affiliations. Your abstract must contain a brief description of your problem, the key contributions of your work, how your work compares to prior research, and any results from evaluation. You may also specify in your submission if your poster presentation will be accompanied by a demo. You may use any standard template for formatting (with a font size no smaller than 10pt).

## 3 SECTION 3

Submissions must be sent via email to [apsys2017.posters\[at\]cse.iitb.ac.in](mailto:apsys2017.posters[at]cse.iitb.ac.in).

The subject line of the email must be the [lastname].[fullname] of the first author. The abstract PDF should be sent as an attachment in the email. Authors of accepted posters will be notified of further instructions for preparing the posters.
