

## PROJECT ON AIR RESERVATION

Date: 07-10-2019

6:30 pm

⇒ we (Kamlesh, Amrit, Manan, Vicky) discussed on the topic of project. during discussion we discussed on projects Cryptography, Air Reservation, Tic-tac toe and Stochastic Cricket. but due to absence of clear idea about stochastic Cricket we ~~dec~~ and tic-tac toe we decided to ~~leave~~ <sup>leave</sup> these programs. ~~and~~ then with cryptography and air reservation we ~~goes~~ <sup>went</sup> to T.A. and finally decided to choose Air Reservation.

Date 09-10-2019

10 pm

As we decided to do project on Airline reservation. we discussed on the basic points of an Airline system such as destination, source, payment mode, planes. we discussed ~~for~~ ~~and~~ ~~we~~ ~~done~~ to choose online system or offline system. we decided to online system but all the basic pts. are discussed for it but ~~payment~~ ~~but~~ we face problems on payment mode and we not get any sol<sup>n</sup> for it then we decided to fix a meeting with our TA ~~on~~ other day.

Date 11-10-2014

10PM

Today we fix a meeting with TA for payment mode in a online air reservation system. He gave suggestions for payment mode in online air reservation system but we feel it is difficult for us as it requires higher knowledge then we are agree on doing offline air reservation.

Date 12-10-2014

10PM

as we decided to do offline air reservation system then we changes in some pts in previous format as it was for the online air reservation system but now we use offline system. payment mode also changes but it is not decided what we made new.

Date 14-10-2014

10PM

Today after searching for on the web we come with other idea as we choosed offline reservation system for payment mode there is a counter for reservation the client with remain the same but the user will be employee of the client other than the ticket counter himself. This way payments will be done offline.

Date 17-10-2019

10pm

today we started designing the algorithm part-  
But on the paper nothing could be done  
but- we discussed so much we get some ideas  
we read file handling and then tried to  
convert the ideas into steps.

Date 18-10-2019

10pm

All the documentation part was done today  
this included SRS draft, user manual  
and project report. its a tedious task to do  
the documentation part
