

18/11/2014-Tue

10:30am-12:30pm-Saw graphic lectures.

19/11/2014-Wed

2:30pm-4:30 and 6:30-8:00pm- Made equally distant rectangles and the click function by using getclick() (but it is not used in the main code)

20/11/2014-Thu

11:30am-1:00pm-studied about events in simple cpp.

3:00pm-5:00pm-figured out logic and made program of entering text.

7:15pm-8:45pm-did research and thought about algorithm for integrator.

21/11/2014-Fri

10-12:10-worked on integrator (code).

2:00-4:00-Learnt fparser and integrated it with integrator function (but there was some logical error)

6-7:45-running each part of the program individually to figure out the logical error.

23/11/2014-Sun

4:00-7:00-figure out the algorithm of double integral and wrote function of double integral.
