

**DATE** : 17/11/2014

**TIME** : 2 hrs 30 min.

**VENUE** : Vivek 's Room.

**DISCUSSION:** I discussed with my team members about the code of Upward function which was going to be used in our game.

**DATE** : 17/11/2014

**TIME** : 1 hrs 30 min.

**VENUE** : My Room.

**DISCUSSION:** I wrote some code for upward function using “if else” construct and “for” loops.

**DATE** : 18/11/2014

**TIME** : 3 hrs.

**VENUE** : Vivek 's Room.

**DISCUSSION:** I discussed the code of upward function with my team members written by me in my room. Try to compile the program, but found some bugs.

**DATE** : 19/11/2014

**TIME** : 3 hrs.

**VENUE** : Vivek 's Room.

**DISCUSSION:** With the help of team members , I correct the errors in code for upward function and run it.

Program for upward function was completely done. I and vivek with assistance of shubham made the program for downward function.

**DATE** : 20/11/2014

**TIME** : 3 hrs 30min

**VENUE** : Vivek 's Room.

**DISCUSSION**: I gave an idea to make right function code by making particular changes in downward function code. Compile the program for right function and it was successfully done.

**DATE** : 21/11/2014

**TIME** : 4 hrs.

**VENUE** : Vivek 's Room.

**DISCUSSION**: Until now game was limited to only one input (w or s or a or d). I and vivek introduce some extra functions for running game(loop associated with asking of input "w,s,a,d") continuously. But found some bugs while execution of program.

**DATE** : 23/11/2014

**TIME** : 3 hrs.

**VENUE** : Vivek 's Room.

**DISCUSSION**: I helped to correct the errors

That were found while compiling the program. I assisted vivek in writing code for random function and also corrected the bugs for it.
