Book Description

Title: Probability And Statistics For Engineers And Scientists

Author: Sheldon. M. Ross

Publisher: Elsevier, New Delhi

Edition: 3

Year: 2005

ISBN: 81-8147-730-8

Scilab numbering policy used in this document and the relation to the above book.

Exa Example (Solved example)

Eqn Equation (Particular equation of the above book)

AP Appendix to Example(Scilab Code that is an Appednix to a particular Example of the above book)

For example, Exa 3.51 means solved example 3.51 of this book. Sec 2.3 means a scilab code whose theory is explained in Section 2.3 of the book.

Contents

List of Scilab Codes

List of Figures

Chapter 2

Descriptive Statistics

Scilab code Exa 2.2a Relative Frequency

```
1 starting_salary = [47 48 49 50 51 52 53 54 56 57
    60];
2 frequency = [4 1 3 5 8 10 0 5 2 3 1];
3 total = sum(frequency);
4 relative_frequency = frequency/total;
5 disp("The relative frequencies are ")
6 disp(relative_frequency)
```

Scilab code Exa 2.2b pie chart

```
1 values = [42 50 32 55 9 12];
2 percentages = values*100 / sum(values);
3 new_text = string(percentages);
4 text = ["Lung ", "Breast ", "Colon ", "Prostate ", "
    Melanoma ", "Bladder "];
5 percentage_sign = ["%", "%", "%", "%", "%", "%"];
6 final_text = text + new_text + percentage_sign;
```

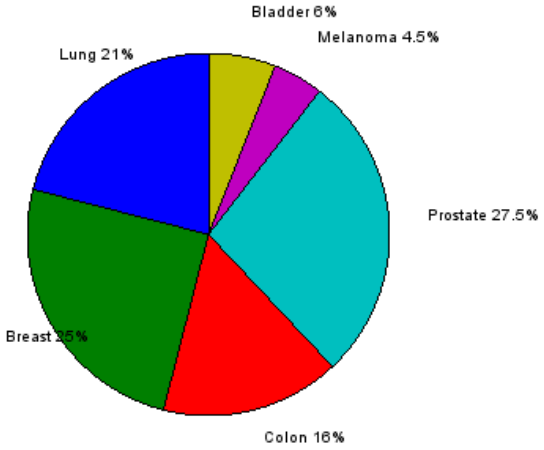

Figure 2.1: pie chart

```
7 //pie([42 50 32 55 9 12], ["Lung", "Breast", "Colon
    ", "Prostate", "Melanoma", "Bladder"]);
8 pie(values , final_text);
```

Scilab code Exa 2.3a Sample mean

```
1 scores=[284, 280, 277, 282, 279, 285, 281, 283, 278,
    277];
2 new_scores = scores - 280;
3 final_mean = mean(new_scores)+ 280;
4 disp(final_mean)
```

Scilab code Exa 2.3b Sample mean of age

```
1 age= [15 16 17 18 19 20];
2 frequencies = [2 5 11 9 14 13];
3 product  = age.*frequencies;
4 total_people = sum(frequencies);
5 mean_age = sum(product)/total_people ;
6 disp("The sample mean of the ages is")
7 disp(mean_age)
```

Scilab code Exa 2.3c Sample Median

```
1 age= [15 16 17 18 19 20];
2 frequencies = [2 5 11 9 14 13];
3 i=1;
4 for j=1:6
