STATEMENT OF PURPOSE

I want to become CR, as in the first 2 semesters I found that a lot of people faced problems in various courses and they were kind of helpless. Some of them felt reluctant to talk to the prof for various reasons and hence suffered even more. If I am elected CR, I would help them by ensuring proper and regular communication between them and the prof. Also I felt, that the students didn't get to know about most the events organised by the department.

If I am elected CR,

1) I will ensure that all the grievances of the students are addressed by proper communication with the prof. For example, many students had problems with pace of the course and they also complained about lack of practise. So, I will ensure that the faculty gets to know of all these issues, so that he can take proper measure.

2) Regular fundae talks with seniors, so that people get to know about the course, which they will be taking in the future and are able to discover their interests and make informed choices about the extra courses they want to take.

3) I will try to organise more frequent meetings with facad, so that he can give his useful inputs to the students.

4) I will request the prof to keep many quizzes with less weightage per quiz so that there isn't too much pressure in one exam.

5) I will try to ensure that quizzes are not kept in such a manner that they disrupt long weekend and that schedule of quizzes are announced very much in advance, so that students are able to book tickets to go home accordingly. I will specially ensure that students get long weekends on festivals like Diwali and Holi by requesting the prof to not keep lectures or keep revision lectures on days near these festivals.

6) I will also try to ensure that lectures held are continuous and there are no gaps between 2 lectures as far as possible. Many students had complained about the 1 hour gap between Maths and CS lectures(on Monday) in second semester.

7) I will represent the class in the best possible way and ensure that all social events are held in the time slots favourable to most of the students and also proper publicity of these events so that everyone gets to know about them.
