WCVA 2016

2nd Workshop on Computer Vision Applications 19th December, Indian Institute of Technology Guwahati

A satellite workshop of the Tenth Indian Conference on Computer Vision, Graphics, and Image Processing (ICVGIP 2016)

Call for Papers

Translation research in the field of computer vision is gaining importance not only because of demanding application-driven theoretical analysis but also for the smart applications that the computer vision techniques are intending to solve. The second workshop on applications of computer vision will provide a perfect platform to present techniques for solving problems of industrial, medical and social importance. The three major tracks of the workshop will be:

- Industrial Applications
- Medical Applications
- Social Applications

This workshop will be held on Monday, December 19, 2016 in conjunction with the tenth Indian Conference on Computer Vision, Graphics, and Image Processing (ICVGIP) at the Indian Institute of Technology, Guwahati, India. We invite researchers to submit their unpublished papers describing high-quality and original research in various application areas of computer vision. In addition to contributory research papers, the workshop will also host invited talk.

The papers accepted and presented in this workshop will be published by Springer LNCS.

All submissions will be handled electronically via the Workshop's CMT submission portal.
