WWW2002

THE ELEVENTH INTERNATIONAL WORLD WIDE WEB CONFERENCE

Sheraton Waikiki
Honolulu, Hawaii, USA
May 7–11, 2002

Since the first WWW conference in1994, the conference series has been the world's premier forum for discussion and debate about the issues surrounding the evolution of the Web, the standardization of its associated technologies, and the impact those technologies are having on society and culture. WWW2002, like its predecessors, will provide a vibrant public forum for the WWW Consortium (W3C) through the annual W3C track.

CALL FOR PARTICIPATION

Hawaii's mid-Pacific location and multi-cultural heritage make it the finest place in the world to draw together a mix of delegates from all continents. Anyone who is passionate about the Web and what it may become should actively participate in WWW2002!

Proposals for conference papers and sessions are actively solicited with deadlines beginning in November, 2001.

Sponsorship and Exhibit opportunities suitable for both small and large organization are available. Increase your company's visibility among the industry's leaders.

PLAN NOW TO ATTEND

Savings will be available for early-bird registrations.
