Vinay J. Ribeiro

Professor, Dept. of Computer Science and Engg.
I.I.T. Bombay, Powai, Mumbai 400076, India
www.cse.iitb.ac.in/~vinayr
vinayr@iitb.ac.in, +91-9899-284-712

Education

Rice University
Ph.D. (2005) and **M.S.** (1999) in Electrical and Computer Engineering

Indian Institute of Technology, Madras
B.Tech. in Electrical Engineering (1997)

Honors and Awards

Awarded Sridhar Shukla Chair Associate Professor in Digital Trust (2023-25)

Awarded Microsoft Outstanding Young Faculty Fellowship, I.I.T. Delhi (2008-12)

Awarded best student paper prize at the Passive and Active Internet Measurement Workshop (2003); paper now has over **1,150 citations**

Elected member of Eta Kappa Nu, the honor society of IEEE (1998)

Awarded Texas Instruments fellowship, Rice University (1997)

Research Experience

Indian Institute of Technology, Bombay

Professor, Department of Computer Science & Engineering (2023-present)
Blockchain, Computer and Network Security.
Associate Professor, Department of Computer Science & Engineering (2019-2023)
Blockchain, Computer and Network Security.

Indian Institute of Technology, Delhi

Associate Professor, Department of Computer Science & Engineering (2014-2019)
Assistant Professor, Department of Computer Science & Engineering (2006-2014)
Blockchain, Computer and Network Security, Cognitive radio, 4G-LTE, Wi-Fi, wireless mesh, ad hoc, Internet of Things (IoT), indoor navigation, mobile applications.

Rice University, Texas

Post-Doctoral Research Associate (2005-2006)
Design and analysis of wireless networks.

Research Assistant (1997-2005)
Developed novel multiscale queuing theory, designed efficient chirp probing tools for available bandwidth estimation of network paths and congestion hot-spot localization, invented fast algorithms for optimal sampling, developed multifractal models for network traffic.

Bell Labs India, Bangalore

Summer Visiting Researcher (2009)
Design of programmable wireless mesh network.

AT&T Shannon Labs, New Jersey

Summer Intern (2001)
Implemented a new measurement technique called "trajectory sampling" in the SSFNET network simulator. Trajectory sampling allows efficient network-wide packet measurements.

Summer Intern (1999)
Analyzed TCP traffic dynamics and its impact on queuing.

Sprint Advanced Technology Labs, California

Research Intern (2001)
Performed an extensive multiscale analysis of Internet backbone traces.

Institut Mittag-Leffler, Stockholm

Research Fellow (2004)
Participated in a semester-long seminar on "Queuing Theory and Teletraffic Theory" at Institut Mittag-Leffler in Stockholm, Sweden.

Indian Institute of Technology, Madras

Undergraduate Research (1996-97)
Design and implementation of a remote packet switch and cordless electronic exchange.

Course Curriculum Development

Wireless Networks (CSL838 at IIT Delhi)

Introduction to Blockchains, Cryptocurrency, and Smart Contracts (SIL763 at IIT Delhi, CS765 at IIT Bombay)

Advanced Blockchain Technologies (CS762 at IIT Bombay)

All India Council for Technical Education (AICTE) model curriculum for course "Computer Networks"

Effective teaching of Computer Networks (CSEDU Certificate program for Computer Science Teachers, supported by ACM India)

Sponsored Research Projects

MEGA-ACE: Multidisciplinary Educational Global Alliance for Algorand Center of Excellence: Blockchain research and education consortium of multiple institutions spread across 5 continents. Sponsored by Algorand Foundation.
Investigators: Prof. Manoj Prabhakaran, Prof. Umesh Bellur, Prof. Vinay J. Ribeiro (IIT Bombay)
Funding Agency: Algorand Foundation (USA)
Date: Jul. 2022 - Jul. 2025
Budget: USD 3,49,408 (approx. Rs. 2.76 Cr.)

Structured Sharing of Networks and Computer Resources in a Community of Devices: Design and development of middleware for device-to-device (D2D) networking for sharing network and compute resources.
Investigators: Prof. H. Saran, Dr. Vinay J. Ribeiro, Dr. S. Sarangi (IIT Delhi)
Funding Agency: Intel Labs University research Office (URO) (USA)
Date: July 2013 - Dec. 2017
Budget: Rs. 1,22,67,582

Algorithms, Protocols and Simulator development for WLAN Optimizations and Internet of Things (IoT): Development of latest Wi-Fi protocols in ns3 simulator and development of bluetooth IoT framework.
Investigators: Dr. V. Ribeiro, Prof. H. Saran (IIT Delhi)
Funding Agency: Cambridge Silicon Radio (India) Pvt. Ltd.
Date: Sept. 2014 - Sept. 2015
Budget: Rs. 12,24,000

TV white Space Trails: Performance evaluation of make-in-India TV white space products.
Investigators: Dr. V. Ribeiro, Prof. H. Saran (IIT Delhi)
Funding Agency: Ministry of Communications & Information Technology, Govt. of India
Date: Apr. 2015 - July 2016
Budget: Rs. 15,80,000

SPARC: SPectrum-Aware Rural Connectivity: Specific objectives of the project are: (i) designing a low-cost spectrum-aware wireless mesh network for long-distance rural backhaul, (ii) developing high-performance but low-cost software defined radio prototypes for the sub-GHz band, (iii) devising new protocols that follow "spectrum etiquette" between devices using potentially different wireless standards, (iv) characterizing spectrum usage and determining optimal allowed transmit power for secondary users in the rural Indian context, and finally, (v) integration of this research on IIT campus testbeds, with a proof of concept demonstration in Indian rural locations.
Investigators: Dr. V. Ribeiro, Dr. Manish Sharma, Prof. H. Saran (IIT Delhi), Dr. K. Chebrolu (IIT Bombay), Dr. B. Raman (IIT Bombay)
Funding Agency: Department of Information Technology, Govt. of India
Date: Mar. 2012 - Aug. 2014
Budget: Rs. 1,67,44,000

LTE Performance Evaluation and Application Development: Performance of small-cell (pico, femto) LTE technology and development of context based applications.
Investigators: Prof. H. Saran, and Dr. V. Ribeiro
Funding Agency: CISCO
Date: Mar. 2012 - Mar. 2016
Budget: Rs. 55,08,000

Design and development of a rapidly deployable Wimax mesh network: This builds a high-performance wireless mesh network to support triple-play services in scenarios where communication infrastructure does not exist such as in military or disaster management.
Investigators: Prof. Huzur Saran, Dr. Vinay Ribeiro, Dr. Kolin Paul, Prof. B. N. Jain
Funding Agency: Department of Information Technology, Govt. of India
Date: Dec. 2008 — June 2012
Budget: Rs. 97,00,000

Design and Implementation of Content Distribution Architecture for Rural and Remote Areas: This project develops the network and application layer protocols for content distribution in Rural areas. This is an Indo-Australia joint project.
Investigators: Dr. A. Seth, Dr. V. Ribeiro, and Prof. H. Saran
Funding Agency: Department of Science and Technology, Govt. of India
Date: Jan. 2011 — Dec. 2013
Budget: Rs. 24,50,000

Cross-layer protocols for enhanced quality of user experience in broadband wireless networks: This project aims to improve resource usage in broadband wireless networks through cross-layer mechanisms.
Investigators: Dr. Swades De, Dr. V. Ribeiro, and Prof. H. M. Gupta
Funding Agency: Department of Science and Technology, Govt. of India
Date: Mar. 2011 — Mar. 2014
Budget: Rs. 41,00,000

Medium Access Layer Scheduling in IEEE 802.11 and IEEE 802.16 Wireless Networks: This project studies performance of OLPC mesh networks and WiMAX point-to-multipoint scheduling schemes.
Investigators: Dr. V. Ribeiro, and Prof. H. Saran
Funding Agency: Marvell India Pvt. Ltd.
Date: Aug. 2008 — Dec. 2012
Budget: Rs. 24,00,000

Managing Secured Documents: Certain documents such as birth certificates must last a lifetime. This project studies how to secure electronic forms of such documents for extended periods of time. We also develop a degree certificate generation and authentication system.
Investigators: Prof. B. N. Jain, and Dr. V. Ribeiro
Funding Agency: National Institute for Smart Government, Govt. of India
Date: June 2007 – Sept. 2011
Budget: Rs. 9,60,000

Production of High Value Therapeutic Proteins using Pichia System: We develop low-cost therapeutic proteins on a large scale using Pichia systems. We envision to use wireless technologies for communication in the control loop of the experiment.
Investigators: Prof. S. Mishra, Dr. V. Sahai, Prof. A. K. Srivastava, Dr. A. Rathore, Dr. J. Gomes, Dr. V. Ribeiro
Funding Agency: Industrial Research and Development Unit, I.I.T. Delhi
Date: Apr. 2011 – Mar. 2016
Budget: Rs. 1,00,00,000

India -UK advanced technology centre (IU-ATC Phase - 2) of excellence in Next generation networks systems and service Indo-UK collaborative project between multiple institutions. Our project involved developing an emergency warning system for Heterogeneous environments.
Investigators: Prof. Subrat Kar, Prof. H. Saran, Dr. Vinay J. Ribeiro
Funding Agency: Department of Science and Technology
Date: Nov. 2012 – Oct. 2015
Budget: Rs. 25,49,000

Tracking human motion via sensor fusion We develop new algorithms for tracking human motion on a real-time basis by fusing data obtained from wireless signals (WiFi, cellular etc.), GPS and inertial sensors.
Investigators: Dr. Vinay J. Ribeiro, Prof. Huzur Saran
Funding Agency: Cambridge Silicon Radio (India) Pvt. Ltd.
Date: Apr. 2013 – Apr. 2014
Budget: Rs. 12,24,000

LTE Performance Evaluation and Application Development-II: Performance of small-cell (pico, femto) LTE technology and development of context based applications.
Investigators: Prof. H. Saran, and Dr. V. Ribeiro
Funding Agency: CISCO
Date: Jun. 2013 - Apr. 2016
Budget: Rs. 19,80,000

Consultancy Projects

Expert report on violation of Blackberry SDK terms and conditions
Investigators: Prof. R. K. Mallik, Dr. Vinay J. Ribeiro
Date: Sept. 2011 - Dec. 2011
Budget: Rs. 10,00,000

Implementation of system architecture of Visible Light Communication-PAN to facilitate multi-user access and mobility
Investigators: Dr. Brejesh Lall, Dr. V. J. Ribeiro
Date: Sept. 2017 - Aug. 2018
Budget: Rs. 17, 40, 000

Query with respect to the technology used for transmission of the channel through IPTV is same/similar to the technology used for transmission of the channel through OTT Platforms
Investigators: Dr. V. J. Ribeiro
Date: Aug. 2017 - Oct. 2017
Budget: Rs. 3,08,774

Opinion on viewing cards used in IRD/Set Top Box
Investigators: Prof. Umesh Bellur, Dr. V. J. Ribeiro
Date: Mar. 2019 - Apr. 2019
Budget: Rs. 4,24,000

Patents

Himanshu Nayar, Vinay J. Ribeiro, Ranjan K. Mallik, **Tunable peak-to-average power ratio frequency division multiplexing** (**US10193728B2**, Date of patent: January 29, 2019)

Umesh Bellur, Nitin Awathare, Sourav Das, Vinay J. Ribeiro, **Method for scaling computation in blockchain by delaying transaction execution** (**US11423016B2** Date of Patent: August 23, 2022; Application No: EP3767514A1, IN201921025326, Priority Date: June 26 2019)

Vinay J. Ribeiro, Ovia Seshadri, **Method in blockchain systems for fast stabilization and increased responsiveness** (Application No: WO2020161530A1, US20220108313A1, IN201911004921 , Priority date: February 7, 2019)

Vinay J. Ribeiro, Ovia Seshadri, **Method in blockchain systems for fast stabilization and increased responsiveness using links** (Application No:WO2020254923A1, IN201911023814, Priority date: June 15, 2019)

Synergistic Activities

Chair Positions

Technical Program Committee chair COMSNETS 2023, Workshop Chair (Blockchain Workshop) at COMSNETS 2019, Finance Chair MOBICOM 2018, Publications Chair IEEE NCC 2013, Student Travel Grant Chair for MOBIHOC 2013, Local Arrangements Chair for ACM SIGCOMM, New Delhi, Aug. 2010. Local Arrangements Chair for IEEE ANTS, New Delhi, Dec. 2009, Organizing Committee for Indo-US workshop on Pervasive Computing, March 2011.

TPC member

ICDCS 2023, ACM SIGMETRICS 2023/2022, COMSNETS 2021/2019/2017/2014/2013/2012, MOBICOM 2013, NCC 2018/2017/2016, IEEE CORAL 2016, WNM 2016, MASCOTS 2013, INFOCOM-WiP'10 (work-in-progress) session, IEEE ANTS 2008, IEEE WISARD 2009/2010/2011, IEEE Globecom 2009, IEEE TENCON 2008, ADCOM 2007 and IEEE Statistical Signal Processing (SSP) 2007, BW3 Blockchain Workshop 2019.

Reviewer (Journals)

IEEE Transaction on Network and Service Management, Journal of Network and Computer Applications (JNCA), IEEE Journal of Selected Areas in Communication (JSAC), IEEE Transactions on Mobile Computing, IEEE Transactions on Networking, IEEE Transactions on Wireless Communications, IEEE Transactions on Management Information Systems, ACM Computing Surveys, CSI Transactions on ICT

National-level Curriculum Development

Developed curriculum for AICTE course "Computer Networks"

Chairman Cyber Security Committee of Multi Commodity Exchange Clearing Corporation Ltd. (MCXCCL)

The committee advises MCXCCL on issues related to cyber security

Graduate Students

Ph.D.

1. L. Rajya Lakshmi (2014) [Co-advised by Prof. B. N. Jain]
   Thesis title: "Handover Management Techniques for WiMax Based Wireless Mesh Networks"
2. Samuel Wedaj (2021), [co-advised by Prof. Kolin Paul]
   Thesis title: "Decentralized Mechanisms To Attest, Recover and Update IoT Networks"
3. Aditya Ahuja (2022)
   Thesis title: "Fair and Regulated Resource Allocation in Blockchain based Decentralized Systems"
4. Nitin Awathare (2022), [co-advised by Prof. Umesh Bellur]
   Thesis title: "On the scalability of blockchains"
5. Ovia Seshadri (submitted thesis 2022)
   Thesis title: "Securely improving performance in PoW blockchains using Links and Anchors"
6. Himanshu Gandhi (passed away Oct'22 before submitting synopsis)
   Thesis topic: BotNet detection for IoT using ML

M.S. (Research)

1. Kashif Shaukat (2018) (Perfect 10 Gold Medal Winner at IIT Delhi)
   Thesis title: "RansomWall - A Layered Defense System against Cryptographic Ransomware Attacks using Machine Learning"

2. Himanshu Gupta (2010)
   Thesis title: "Revisiting Internet Traffic Scaling Behavior and Properties"

M.Tech. 55 students

Personal

Nationality: Indian

Date of Birth: May 19, 1976
